

Data Sheet

JIGSAWTEK CYBERSECURITY SERVICES

Prepare your technology and train your staff for cyberattacks.

Are you prepared for a cyberattack? The fact is more than 60% of small businesses are attacked every year! According to government agencies, the best response is to protect your technology and make your staff cybersecurity aware. JigsawTek's Cybersecurity Services provides layers of protection for your technology and extensive awareness training for your employees. In the event of a cyberattack, JigsawTek has the tools and expertise to get your business up and running quickly—minimizing your downtime impact.

IDENTIFY

Inventory equipment including software, data usage, laptops, smartphones, tablets, and point-of-sale devices. Create a detailed cybersecurity policy.

PROTECT

Limit cyberattacks by managing physical and remote access. Train your staff in cybersecurity awareness and use phishing simulations often. Safeguard technology by applying multiple security techniques.

DETECT

Be able to detect and identify security breaches and cyberattacks and its impact. Verify effectiveness of protection measures. Have detection processes to help recognize unusual activity.

RESPOND

Take action against an attack. Have a response plan with a chain of command. Get information during the attack and respond quickly using policies in place to get rid of the threat.

RECOVER

Use processes and procedures to restore systems and assets affected by the attack. Make improvements based on lessons learned and strategy review. Communicate during and following an incident.
