## IT Management for Your Business

Small business is under increasing pressure to keep up with emerging technologies while keeping costs affordable. How can your business have fewer systems interruptions and less downtime? Our JigsawTek IT Team has all your technology answers.

### Your IT Team—24/7/365

To run your business smoothly, you may need network specialists, cybersecurity experts, database specialists, business analysts, system architects, programming resources, and help desk professionals. The best part is JigsawTek provides your entire IT team 24/7/365. We manage your software and system—allowing you to focus on your business.

### Predictable Costs

Small companies need affordable IT services. With managed IT, small business has access to a range of expertise and insights. Proactive services and regular monitoring predict and prevent many “last minute” emergencies. IT spending becomes a managed, predictable, budget-friendly expense—rather than an unexpected surprise.

### Experienced Professionals

Your business data is one of your most important assets. JigsawTek has experienced IT professionals with a wide breadth of knowledge dedicated to

servicing your specific business needs. Our team handles all of your technology demands including cloud, cybersecurity, workstations, and networks to name a few. This frees up your time to work on your business rather than dealing with the demands of technology.

### Efficient Upgrades

Another major benefit to outsourcing IT is the quick turnaround time when implementing new technology. JigsawTek recommends options when choosing upgrades. Our team plans and coordinates equipment upgrades and data migrations to avoid costly business interruptions.

### Our Approach

We believe all the benefits of a big IT team should be available to small business at a reasonable cost. JigsawTek offers a team of experienced and dedicated IT professionals to expertly plan and evaluate your current technology situation. Let us show you how custom software and network security solutions allow your business to have all the benefits of a well-managed technology solution.
